### PACKAGE TREATMENT FLOW DIAGRAM

- |                      |                             |
|----------------------|-----------------------------|
| 1 - WASTEWATER INLET | 6 - BIOLOGICAL REACTOR      |
| 2 - SCREEN CHANNEL   | 7 - BLOWER AND DISINFECTION |
| 3 - PRE-SEDATION     | 8 - AIR LINE (DIFFUSER)     |
| 4 - BALANCING BASIN  | 9 - DISCHARGE PUMP          |
| 5 - LIFTING PUMP     | 10 - DISCHARGE LINE         |

### MATERIAL AND DESIGN

ST37 CARBON STEEL AND TRAPEZE BENDING

# PACKAGE WASTEWATER TREATMENT SYSTEMS

## COMPACT SOLUTIONS!

Package wastewater treatment systems and plants, as the name suggests, are compactly designed, economical and easy to transmit wastewater treatment methods.

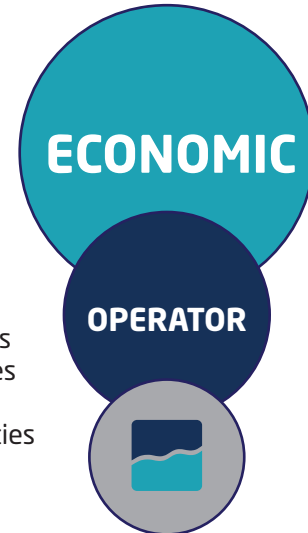

Package wastewater treatment systems; They are generally used for the treatment of domestic biological waste water. Package treatment systems are produced in our production facilities for 100 people and 1000 people, with a production time of 7-15 days. It is generally produced as 4 mm - ST37 Karban steel and trapezoidal twist.

**By adding package treatment units, they can meet the desired flow rate and need.**

## AREA OF USAGE

- Mass Housing and Sites
- Penitentiary Institutions
- Military Facilities and Defense Industry
- Organized Industrial Zones
- Universities and Campuses
- Hotels and Resorts
- Construction sites
- Hobby Gardens and Nature Tourism
- Caravan Campgrounds
- Refugee and Temporary Campgrounds
- Slaughterhouses and Slaughterhouses
- Fruit Juice and Processing Plants
- Dairy Factories and Production Facilities
- Textile Industry and dyeing plant

We Treat The  
World's Water!
